

FUNCTION

The **IN 4102LS** is a large LED display meter used in industrial applications. This meter functions with a serial interface and allows a distance viewing up to 50 m. This display is supplied with a sheet steel housing used for severe environments.

CHARACTERISTICS

Input :	serial interface 20 mA current loop or according to RS232C / V24, RS422A Configuration by micro-switches
Display :	4 digit LED, 102 mm digit height with decimal point
Transmission :	
Protocol:	J bus or other on request
Data format:	8 data bits, odd parity, 1 stop bit other data format on request
Baud rate:	From 1200 to 9600 bauds Configuration by micro-switches
Junction:	
Power supply :	Screw terminal (across a metal cable gland) or Chassis plug
Serial input:	Screw terminal (across a metal cable gland) or panel socket Han type
Housing:	sheet steel box recovered with polyester powder paint, with red polycarbonate front panel , sealed to IP65.
Size :	420 x 212 x 135 mm (L x H x D)
Weight :	5,5 Kg
Power suply :	230 /110VAC, 12 or 24 VDC in option
Guarantee :	2 years

Special display meters can be designed by our development team
