HEATING BENCH

DESCRIPTION

The Heating Bench polymerises coil winding elements by Joule effect, it integrates either one, two or three 200, 250 or 600V Heating modules and a resistivity test module.

This bench has been specifically designed and optimized for production and maintenance in various copper coil winding productions to be quickly inserted on your production line.

The overall is driven by our software with allows :

- an optimized test time to earn production time
- a very short installation and setup time
- an optimized maintenance for a quick diagnosis
- a driving by automaton (RS) or autonomy if no automaton
- regular updates to benefit from the latest evolutions.
